

testing::TestPartResultReporterInterface

testing::TestPartResultReporterInterface

testing::internal::DefaultGlobalTestPartResultReporter

```
graph BT; A[testing::TestPartResultReporterInterface] <|-- B[testing::internal::DefaultGlobalTestPartResultReporter];
```

The diagram illustrates an inheritance relationship. At the top, there are two identical boxes representing the interface `testing::TestPartResultReporterInterface`. Below them, centered, is a box representing the implementation `testing::internal::DefaultGlobalTestPartResultReporter`. A horizontal line with upward-pointing arrows at both ends connects the two top boxes. A vertical line descends from the center of this horizontal line to the top of the bottom box, indicating that the bottom class inherits from the interface.
