

testing::TestPartResultReporterInterface

testing::TestPartResultReporterInterface

testing::internal::DefaultPerThreadTestPartResultReporter

```
classDiagram
    class A["testing::TestPartResultReporterInterface"]
    class B["testing::internal::DefaultPerThreadTestPartResultReporter"]
    B --|> A
```

The diagram illustrates an inheritance relationship. At the top, there are two identical boxes representing the `testing::TestPartResultReporterInterface`. Below them, centered, is a box for `testing::internal::DefaultPerThreadTestPartResultReporter`. A horizontal line with upward-pointing arrows at both ends connects the two top boxes. A vertical line descends from the center of this horizontal line to the top of the bottom box, indicating that the bottom class inherits from the interface.
